Rise 360 Basic Overview

June 2024

articulate 360 Product Suite

What is Rise 360?

Rise 360 is a web app that lets you create beautiful, fully-responsive courses fast.

Rise 360 can be used to create full-length courses, microlearning, and content such as HR, workplace safety, compliance, sales, and management. Some examples of projects that use Rise 360 include new employee orientation and new manager's toolkits.
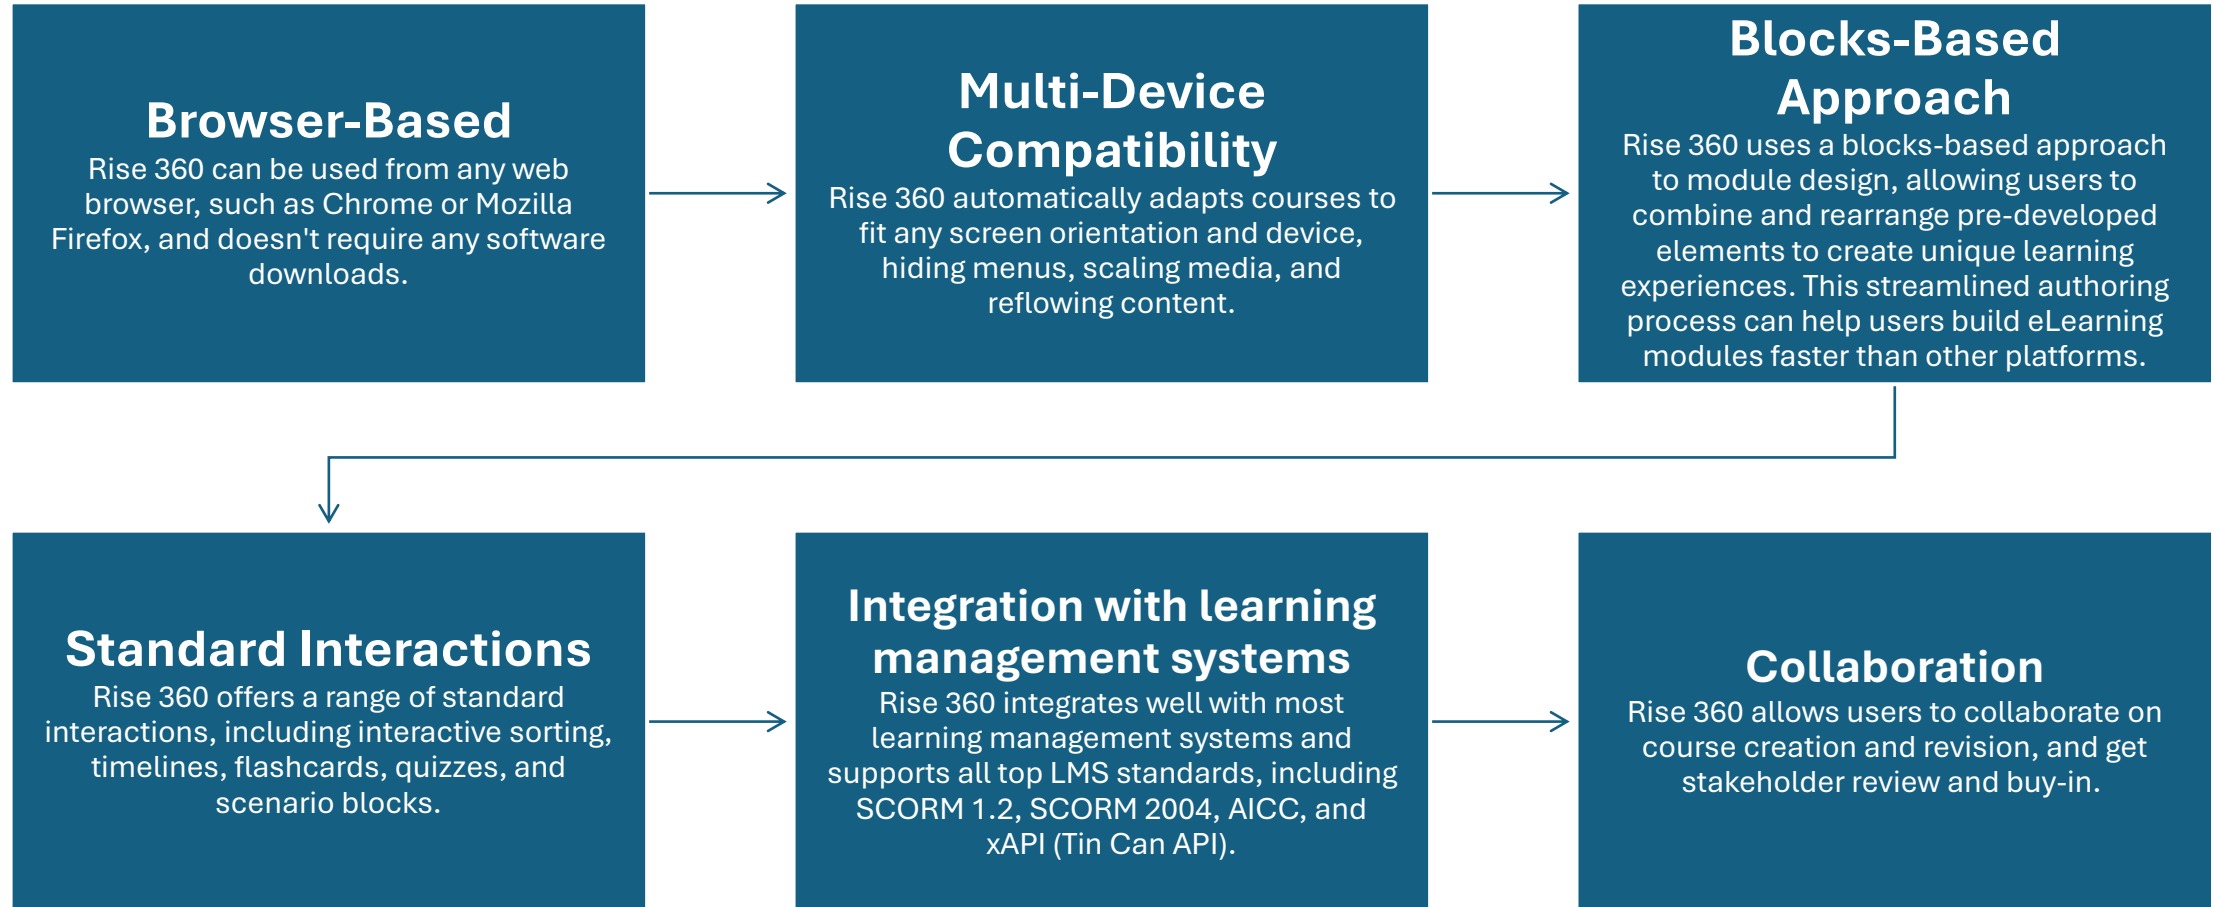

Rise 360 Supports Team Collaboration

Articulate 360 Teams get exclusive product features that help you collaborate, such as Rise 360 collaborative authoring. Team members can create and edit different lessons in the same course at the same time or take turns fine-tuning the same lesson. You can even give collaborators different levels of access by making them course collaborators or course managers.

Rise 360 Web Distribution

- If you just need to give someone a quick view of your Rise 360 course, open your course for editing, click **Share** in the upper right corner, copy the shareable link, and send it to your viewers.

- The best option for distributing a web-based Rise 360 course is to open it for editing, click **Export** in the upper right corner, select **No LMS - Web Only** from the **LMS** drop-down list, then click **Export** in the upper right corner again. You'll get a zip package containing all the files for your course. Just extract the zip package, upload the files to your web server, and give learners a link to the index.html file.

- [See this article to learn more about sharing Rise 360 courses](#).
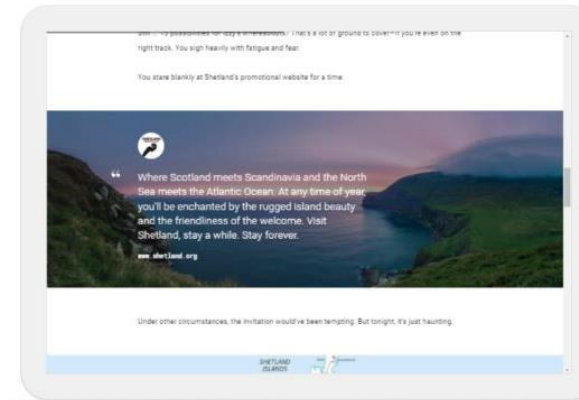

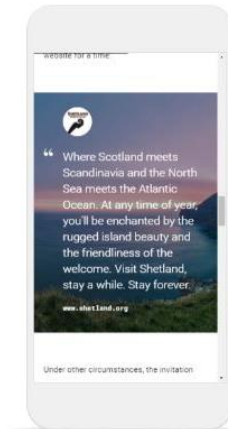

Top Reasons to Use Rise 360

Browser-Based
Rise 360 can be used from any web browser, such as Chrome or Mozilla Firefox, and doesn't require any software downloads.

Multi-Device Compatibility
Rise 360 automatically adapts courses to fit any screen orientation and device, hiding menus, scaling media, and reflowing content.

Blocks-Based Approach
Rise 360 uses a blocks-based approach to module design, allowing users to combine and rearrange pre-developed elements to create unique learning experiences. This streamlined authoring process can help users build eLearning modules faster than other platforms.

Standard Interactions
Rise 360 offers a range of standard interactions, including interactive sorting, timelines, flashcards, quizzes, and scenario blocks.

Integration with learning management systems
Rise 360 integrates well with most learning management systems and supports all top LMS standards, including SCORM 1.2, SCORM 2004, AICC, and xAPI (Tin Can API).

Collaboration
Rise 360 allows users to collaborate on course creation and revision, and get stakeholder review and buy-in.
